March 2011

INTRODUCTION

HISTORY

Georsame Ltd was founded in 1998 as a sister company of G&E Thermosolar Ltd. The main scope of work is the provision of electrical and mechanical works mainly arising out of contracts with various government departments, civil works contractors and the British Bases.

Based in Larnaca we have offered our services throughout Cyprus and our attention to customer service and finishing projects to a high standard has helped us maintain continual growth and build a strong customer base of repeat business and recommendations.

LEGAL STATUS

Georsame Ltd is a Limited Liability company registered with the registrar of companies in Cyprus. It is a private company owned and directed by Mr George Christofi and Mr Doros Elpidorou. Actively involved in the day to day business of Georsame Ltd are the managerial team of G&E Thermosolar Ltd. The technical manager of the company is Mr Yiannis Dryades.

Its bankers are the Bank of Cyprus and Hellenic Bank. Auditors are KPMG and its legal advisors are Harris Kyriakides LLC.

Georsame is able to actively participate in public tenders as it holds a CLASS A License from the EMS department and because it fulfills the governments requirement to have all its obligations to the social security department, inland revenue and VAT authority fully settled.

ELECTRICAL INSTALLATIONS

From minor domestic household installations for building contractors, through to major power supply and distribution systems, full electrical refurbishments, security and emergency systems our expertise crosses the full board of electrical design and fitting. Our experience includes a wide range of industries and all kinds of new build installations alongside major building contractors.

MECHANICAL INSTALLATIONS

The company provides a complete mechanical service, from inception of projects to completion as per specifications. It involves designing, planning, installation and documentation in all areas where equipment is installed. We can also carry out repairs of complete mechanical infrastructure.

MAINTENANCE WORK

Even the highest standards of installations require occasional maintenance and legally compliant inspections and testing. We provide our clients with comprehensive coverage including PAT testing, fault finding, planned preventive maintenance contracts and a variety of other testing for safety and legal compliance.
